

Troy Latter

Independent Director | Strategy, People, Technology & Human Outcomes

Board profile

Troy Latter is a technology, AI and transformation executive, founder and board adviser with more than 20 years' experience across government, Defence, public safety, health, financial services, critical infrastructure and major enterprise environments. He combines strategic transformation, commercial judgement, emerging technology and human-centred innovation.

Board contribution

Troy helps boards understand the consequences of technology and AI decisions without reducing governance to technology selection. He connects investment to strategy, people, capability, financial sustainability, risk, inclusion and measurable outcomes.

Selected board capabilities

- Strategy and growth; organisational transformation; people and capability.
- Technology, AI, data, cyber, privacy and operational resilience.
- Financial and commercial decision-making, business cases, vendor and investment discipline.
- Government, regulation, public-sector accountability and complex stakeholder environments.
- Partnerships across government, corporate, community, technology and professional ecosystems.
- Human capability, inclusion, accessibility, neurodiversity, ageing, education and social impact.

Executive experience

Tech 4Humanity — Founder / CEO | 2025–Present

Leads a portfolio of human-centred AI and digital initiatives, with accountability for strategy, technology, partnerships, product development and commercialisation.
